ULTRA BOARD™

ALUMINUM

A brilliant alternative to metals. Elegant metal signs and letters can cost you and your client a bundle. Now there is a lightweight, cost effective and easily crafted alternative. UltraBoard Aluminum delivers the same impact and appeal as metal, but in a durable, versatile foam core product.

UltraBoard Aluminum's foam core features an anodized aluminum facer and polystyrene backer.

OUR PRODUCTS

The industry favorite. Our most popular and versatile substrate featuring a styrene foam core and facers.

Piced to beat competitors. One of the most cost-effective foam core substrates available on the market.

Ideal for digital prints with a styrene foam core faced on both sides by ultra white poly coated Kraft paper.

The most rigid foam core panel available. A 1mm PVC facer alternative to cheaper materials like plywood.

The showstopper of foam core mounting boards used for art, print and photographic mount applications.

3/16" foam with 12 pt. white clay coated papers. Cost-effective and ideal for temporary applications.

Gallery-ready mount board featuring a high-tack acrylic adhesive pre-coating on one side and a black or white edge banded finish.

Utilized by commercial development labs for its very smooth .030" thick styrene liners with Peel N' Stick high tack adhesive on one side.

Features a heavy and dense styrene foam core between 18 pt. polyethylene coated paper liners with Peel N' Stick high tack adhesive on one side.

Polystyrene core faced on both sides by smooth clay coated paper with Peel N' Stick high tack adhesive on one side.

A light-weight Anodized Aluminum facer is a cost effective solid-metal alternative. The appeal of metal with the advantages of foam.
