Optix LD 2406 White

LET YOUR BRAND SHINE EVEN BRIGHTER

with Plaskolite Optix LD 2406

Optix LD 2406 Light Diffusing Acrylic is the ideal choice for decorative vinyl applications requiring high light output and dramatically increased light transmission, compared to standard sign whites, while diffusing the light source to reduce hot spots.

Reduce the light source and save energy and money or keep the light source the same and let your image shine.

Now that's a bright idea.

- » Dramatically enhances difficult to illuminate films such as dual color film, perforated film and darker hues of color
- » Eliminates pin points of light and hot spots providing even and consistent illumination
- » Allows for shallower lens depth to light source for greater design flexibility
- » Ideal as a lens for any light source including LEDs and Fluorescents
- » Great for cabinet and channel letter illumination
- » Available in standard sizes and thicknesses

Discover Optix LD Acrylic

While traditional sign white may still be the best option for plain white exterior channel letters, **Optix LD 2406** is the new choice for vinyl decorated signage, perforated day/night signs, and backlit interior signs and graphics.

- » Those hard to light darker hues of vinyl pop
- » Get more brilliance from perforated films
- » Maximize indoor signage and displays
- » Enhance your digital prints with a more vibrant image

AVAILABLE STOCK SIZES

- » 1/8 SG 2406 White 51 x 100 Film Mask
